

January 22, 2557 BC. - The previous version of the code is now restored. DDE plugin: The 64-bit version of the DDE plugin was giving incorrect timestamps. Fixed. The default seed for .dll files installed with the DDE application: In version 2.x, all DLL files installed with the DDE application had a default seed installed. This caused all DLLs contained in a DDE application to use the same seed, making them incompatible. The default seed will be kept in the new version as well. Default seed for .net files: In the previous version, all .NET files installed using the DDE application had a default seed.
