About Us Do you remember the TV show “Breaking Bad”? We are that Breaking Bad... We focus on bringing you great content from across the internet. Watch and download HD, SD full episodes with English Subtitles for free. TV Shows, Hollywood Movies, Anime, Sports, Kids, and even more... All the content you want just a few clicks away...Culture of Peripheral Blood Mononuclear Cells from Patients with rheumatoid arthritis. Peripheral blood mononuclear cells (PBMCs) obtained from patients with rheumatoid arthritis (RA) were cultured with or without concanavalin A (ConA) and phytohaemagglutinin (PHA) to assess proliferative responses. The mean proliferative responses to PHA and ConA in PBMCs obtained from RA patients with anti-cyclic citrullinated peptide antibody (anti-CCP) were significantly lower than those without anti-CCP. The proliferative responses to PHA and ConA in PBMCs obtained from RA patients with HLA-B27 were significantly lower than those in RA patients without HLA-B27. The results of this study suggest that PBMCs obtained from RA patients proliferate

by stimulation with a T-cell-dependent mitogen, ConA and a T-cell-independent mitogen, PHA. We conclude that immune responses to T-cell-dependent and T-cell-independent stimuli in RA may be significantly reduced.Q: How to map typed JSON object with POJO? I have JSON object declared like this: @Value private JsonObject object; I have a POJO like this: public class MyPojo implements Serializable { private Integer amount; private String time; public Integer getAmount() { return amount; } public void setAmount(Integer amount) { this.amount = amount; } public String getTime() { return time; } public void setTime(String time) { this.time = time; } } I have a Spring MVC c6a93da74d
