Adobe After Effects 2020 17.0.0.555 (x64) Multilingual [x64].Chemopreventive activity of chalcone derivatives on the initiation phase of 7,12-dimethylbenz[alpha]anthracene-induced rat mammary carcinogenesis. A natural chalcone, S-4,4'-dihydroxychalcone (1), and its derivatives, 2,3,4-trihydroxychalcone (2), 2',6-dihydroxychalcone (3), 3,4-dihydroxychalcone (4), and 3,4,4'-trihydroxychalcone (5), have been synthesized and evaluated for the chemopreventive activity in female Sprague-Dawley rats that were initiated with the carcinogen, 7,12-dimethylbenz[alpha]anthracene. At doses of 100 and 200 microg/kg administered for 6 weeks, 1, 2, and 4, but not 5, prevented tumorigenesis with a dose-dependent chemopreventive effectiveness. None of these compounds produced any treatment-related mortality. 1, 2, and 4 also caused a dose-dependent decrease in mammary proliferating cell nuclear antigen (PCNA)-positive cells and a decrease in mammary cell apoptosis. Based on the results of this study, 1, 2, and 4 can be considered potential chemopreventive agents.id: pe_client_new_task_multithreaded_execution label: "Threaded Tasks Execution" options: - "Run on a single thread" - "Run on multiple threads" - "Execute multiple tasks simultaneously (batches)" - "Execute task with fixed duration" - "Execute task with random duration" - "Execute task with fixed delay" - "Execute task with random delay" - "Execute task with fixed number of iterations" - "Execute task with random number of iterations" - "Execute task with fixed number of times" - "Execute task with random number
