Tiedeakatemia, STT) in cooperation with BioFach and the Finnish Biotech Association (Suomen Tervajohtamot, STV). In the latest edition, experts will focus on the latest trends and technologies within the Biotech and Biomedical Engineering fields, and offer guidance on the use of open innovation and open science practices. The DICE Biotech Workshop is organized under the theme of "Sustainability and Open Science in the Life Sciences." The theme serves as a forum for discussion on the potential benefits of open science and open innovation practices in areas of biology and medicine where there is a high level of uncertainty, often resulting in wasted resources, unnecessary duplication and time delays. At the same time, the workshop will focus on the potential challenges in transforming these practices into useful practices. "The increase in the level of uncertainty of life sciences research has been one of the most visible changes over the past years. Whereas the world economy had been running on a clear growth path, the life sciences industry is now experiencing an unprecedented contraction," said Markku Oks
