We are the Fireteam, a team of highly skilled people dedicated to creating an insane experience in VR. To do so, we've been hard at work on a simulation centered VR First person shooter. To release a gun or melee sim in VR is tricky business, as some of the most popular genres of VR games have very complex interactions which can leave you throwing up in your headset if you don't plan for them. We have ensured that Outrageous is smooth and intuitive by ensuring that all bullets have a realistic backspin, as well as a realistic kick. As we were developing this game, we were also keen on providing the multiplayer player a feature that allows them to practice their shooting mechanics in a more controlled environment than a full fledged VR game. After many long hours in testing, we figured out a mechanic that produces a similar feeling as the one you get from playing FPS games. We call it 'Interactive Simulated Breakdowns' (a.k.a the Swing) In our game, the swing feels like a real recoil action if you are holding the shotgun while it is swinging back and forth by your body. This prevents people from swinging with their gun, while keeping players engaged in the scenario. published:10 Dec 2016 views:760649 Outrageous - is a VR simulation-shooter for HTC Vive created in VRGloveStudio (VRGS) 2D game engine. Enjoy watching a short video of gameplay to understand the idea behind this game and how it looks like: You and your co-pilot are a part of a special forces unit known as "The Fireteam". Your convoy of vehicles is ambushed by a band of rogue armed forces which have misgivings with your line of work in the recent past. Chased in your vehicle you and your co-pilot shoot, drive and ride dangerously to reach safety. You have been a soldier for a while and have a variety of weapons at your disposal. Managing your load-out of guns, knives and other equipment is very important in this game. You must shoot, dodge, jump and find cover when incoming enemies with their assault rifles and rocket launchers turn their sights on you. You will be able to sneak behind enemy lines without anyone noticing. You will find yourself in dark places that no one wants to be. You will control your character in third person. Your motion

After three years of being transported, they finally woke up in a hell-hole in the wilderness, where they met cannibal tribe Northern Edge. They learned that their new family loved them and would protect them, but that they also had an infected outsider, aka werewolf, living with them, who threatened to turn them. The Dukes asked if they could live with their tribe for a while and become one of them, but the Northern Edge tribe refused to accept them because they were, in a way, twins. For reasons they never knew, a day came when the tribe agreed to take Thomas and Danny in, but a hunter slew a very special creature called a gray wolf. They learned that the tribes were at war with an evil enemy called killers who killed with axes and knives and ate that person in a cannibalistic feast. The tribe was decimated but pardoned the boys and promised them that justice would come to the killers. Over the days and years that have passed in the wilderness, the Dukes were befriended by Jean-Lou Boudreaux and his wife, and they became their sons and grandson, so to speak, and learned that the brothers' parents had been killed by predators while trekking through the desert. But when the brothers returned to the group, they learned that the tribe had been captured by the killers who were now holding the tribe hostage in a camp by the lake. That was the day they decided to kill everyone in the camp, but when the tribe led their friends to a large cliff where they could leap to freedom, they found not just one boy they wanted to free but two; one was really Danny and the
