Have you ever felt weird when the doors and windows of your office are closed? Some of you may be forced to work in such a situation for a short period of time. You have probably been annoyed by your boss in this situation. This is exactly the situation in "My boss is weird". You will find yourself being fooled by your boss, whom you consider to be a responsible, caring person. You'll have to make your choices carefully, based on these assumed characteristics of your boss. When you start the game, you don't know what your boss is planning to do. With the cards you will be handed, you are asked to make a choice between different options. You will need to make a decision quickly. This is because time is running out... Basic Information: "My boss is weird" is a new entry into the AVG series of games, with a traditional mixed-media multi-narrative experience. This game is targeted at the senses, with novel and vivid graphics, music and visuals, appealing to both young and older players.

---

Comments: • Take your time to determine which card to play for each deck. Since the game is set in a short period of time, you have to make a choice quick. • The developers at AVG have fully considered the concerns of the users. Certain cards are only used when they are appropriate for the player's situation. • Improve your abilities and develop your physical strength so that you can cope with your boss's attack at the end. • You may be able to make choices that help your social intelligence and your mental age. • You can learn what your boss is thinking while you are sleeping. I can't reveal the secret yet. Useful tips: When you first start the game, you will find the game is boring. You may feel distracted and eventually feel passive. When this happens, try your best to get focused. All the information you are given in this game is not the full truth. If you want to know the whole truth, think of the option you would choose for your next card. If you get stuck, or if you want to change your character's face to a new model, you can reset the game. Currently, the game does not have a continuous smooth

progress. You may need to back up the game to re-create it. The sound of the game will likely not bother you; however, please be aware that the voice is not recorded in English. This is a game
